

TASK FORCE

DETERMINANTS OF HEALTH INEQUALITIES

European Burden of Disease Network

Elena von der Lippe

vonderLippeE@rki.de

Orsolya Varga

varga.orsolya@med.unideb.hu

Background

- End of January 2022 -> Management committee and working groups meeting
- Task Forces establishment
- Smaller groups of network members that aim to perform collaborative activities on a specific topic

Task Force

Determinants of health inequalities

- Subgroup of the Working Group Methods
- almost 30 active participants
- Coordinator: Elena von der Lippe
- meetings online about every 6 weeks

Determinants of health inequalities

- Income and social status
- Employment and working conditions
- Education and literacy
- Physical environment
- Access to health services

Aims

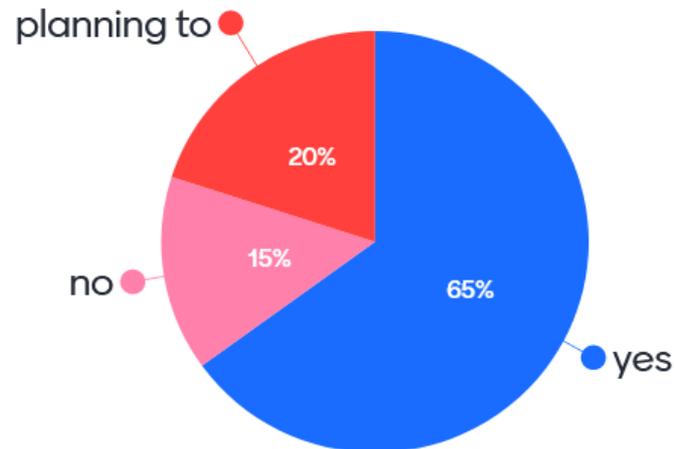

- Share experiences in research on health inequalities
- Provide platform for collaborative activities and discussions
- Work on harmonizing health inequalities indicators and applied methodologies
- Enforce cross-country comparisons

Participants

- Very different background
- Different experience in research in social inequalities

Participants

Are you currently engaged in work on social inequalities in health?

Activities

- Paper Proposal GBD 2020
 - Inequalities in the burden of disease of 44 European countries from 1990 to 2019
 - secondary database descriptive study using the GBD 2019 results on age-standardized DALY in 44 European countries from 1990 to 2019
- Further topics are explored
 - Regional differences
 - Inequalities in mortality

Activities

- Participation in Inequalities in COVID-19 mortality project
- Input from external experts
- Discussion on individual research topics
- Outline of upcoming projects and data

Membership

- Open to everybody interested
- Email to: vonderLippeE@rki.de
